

# FreightMaster TMS® Web Services Adapter

## Standard Integration with any Platform!

### No More Integration Nightmares!

We all know that integration between software platforms is a key component of software TCO and a major hurdle to implementation.

The FreightMaster TMS® Web Services Adapter allows Freight Master TMS® to be interfaced with your existing platform using a standard implementation of Web Services. (SOAP/XML/HTTP)

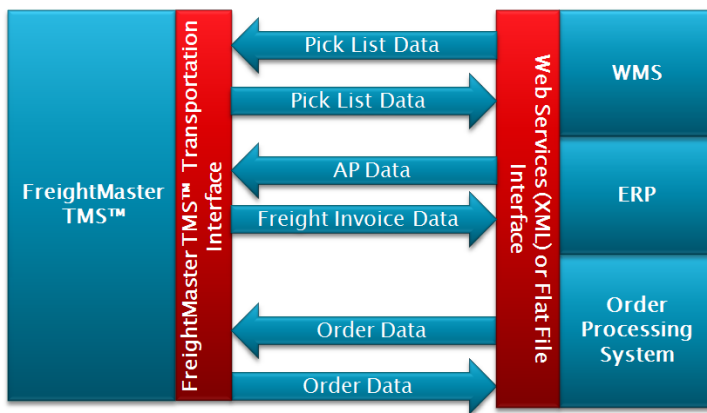

### Go Beyond Integration!

Supply chain is process driven, go beyond integration and automate your supply chain processes.

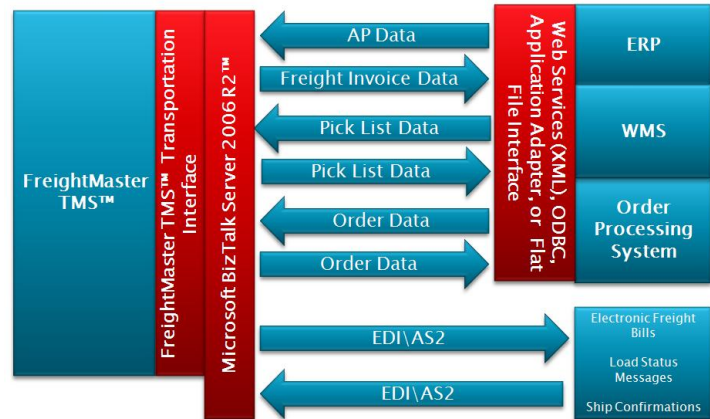

Utilizing Microsoft BizTalk Server 2006 R2™ and FreightMaster TMS® Web Services Adapter you can automate your supply chain processes.

Implementing the BizTalk AS2 adapter enables extending your business process automation securely to your trading partners.
